To Whom It May Concern,

It is with genuine pleasure that I recommend Akash Chatla, who was a student in my Programming for Data Science in Technology course within the Master of Science in Technology program at Eastern Illinois University. I had the opportunity to instruct Akash during his enrollment, and I consistently found him to be a highly motivated and dedicated individual with a strong aptitude for programming and a commitment to understanding both fundamental and complex concepts.

Akash distinguished himself in my course, achieving an excellent grade of A through his diligent work, active participation, and adept problem-solving skills. His approach to programming was particularly notable; he consistently demonstrated a structured and logical mindset, often developing solutions that surpassed standard requirements in terms of efficiency and scalability. He actively engaged in classroom discussions and collaborated effectively with his peers on group projects, showcasing both leadership qualities and significant technical proficiency.

Beyond his academic achievements, Akash possesses relevant professional experience. Prior to commencing his graduate studies, he served as a Full Stack Java Developer at OSI Digital, where he contributed to the development of scalable web applications utilizing technologies such as Angular, Node.js, Spring Boot, and MySQL. He effectively integrated this practical industry knowledge into our classroom environment, often providing valuable insights that connected academic theory with real-world application.

Based on his academic performance, professional background, and demonstrated skills, I am confident that Akash Chatla will be a valuable contributor to any organization. His technical capabilities, combined with his strong work ethic, eagerness to learn, and effective communication skills, make him an excellent candidate for roles in full stack development, backend services, or technical problem-solving environments.

Please do not hesitate to contact me if you require any further information regarding Akash's qualifications.

Sincerely,

Naima Toqeer Israr
Instructor,
School of Technology
